Sometimes it seems as if everyone knows someone who is affected by diabetes. More than in 9 African American adults have diabetes. African Americans are . 8 times as likely to have diabetes as non-Hispanic whites of the same age . Researchers estimate that if diabetes continues to increase at its current rate, in 3 children born in the year 2000 will develop diabetes in their lifetime unless something changes. Diabetes can cause heart disease, stroke, kidney failure, lower-limb amputations, and blindness, but it doesn't have to. In many cases it is possible to prevent or delay type 2 diabetes in people at high risk. Scientists who conducted the Diabetes Prevention Program (DPP) study² found that people can prevent or delay type 2 diabetes by losing some weight (57 percent of their weight), eating a healthy diet (low fat, lower calorie), and increasing their physical activity. High-risk adults who participated in the study's lifestyle modification activities reduced their risk of developing type 2 diabetes by 58 percent; they lost 5 to 7 percent of their body weight (0.5 pounds for...
