

The Elements of Clinical Diagnosis (Paperback)

By Georg Klemperer

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 Excerpt: .course, frequently, with attacks of bronchial asthma. Chronic bronchitis may lead, through retention of the secretions, to sac-like dilatations of the smaller air-passages (bronchiectasis). Small bronchiectases usually escape diagnosis. In large bronchiectases, there may be a marked stagnation of pus, which undergoes putrefaction (see fetid bronchitis). The sputum, in such cases, is expectorated in the morning frequently by mouthfuls, and arranges itself in three layers. Large bronchiectases give the physical signs of cavities; they usually occupy the lower lobes, and may be concealed by the corresponding compression of the tissues of the lung s. The etiological irritation which is the cause of bronchitis (dust, etc.) may also evoke interstitial inflammation in the lung, which may lead to formation of connective tissue, and to contraction (interstitial fibrous pneumonia, cirrhosis of the lung, pneumoconiosis). Bronchitis may also, in this way, be responsible for areas of dulness. It must...
