Reviews

This book is great. it was writtern quite flawlessly and helpful. You will not truly feel monotony at whenever you want of your time (that's what catalogs are for concerning if you ask me).

(Sterling Kris)

ANALYTISCHE GEOMETRIE DES KREISES

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 106 pages. Original publisher: Seattle, Wash. : U. S. Dept. of Commerce, National Oceanic and Atmospheric Administration, National Marine Fisheries Service, Alaska Fisheries Science Center 1998 LC Number: SH11. A2 N62 no. 91 OCLC Number: (OCoLC)575608300 Subject: Time-series analysis. Excerpt: . . . 2 Air Temperatures Maximum, minimum, and current air temperatures were measured by liquid-in-glass thermometers from February 1963 through July 1988. Beginning in August 1988, air temperature observations were taken with an electronic maximum minimum system. The liquid-in-glass thermometers serve as backup during frequent electric power outages. Since October 1979, a paper-recording battery-powered hygrothermograph has served as backup to both standard systems for occasions when an observer is unavailable. All air temperatures were recorded in degrees Fahrenheit to the nearest whole degree. For this report the temperatures have been converted to the Celsius scale. Precipitation Daily precipitation observations from a standard 8-inch (20. 3 cm) nonrecording gage were recorded to the nearest 0. 01 inch. Precipitation includes the water equivalent of any snowfall or ice pellets. Daily snowfall and snow on the ground were measured with standard 12-inch and 36-inch rulers. Snowfall was recorded to the nearest 0. 1 inch and snow on the ground recorded to the nearest whole inch. For this report, average precipitation records were converted to centimeters. Snow-on-the-ground data have not been analyzed for this report. Auke Bay Saltwater Temperatures Auke Bay Laboratory Daily sea surface temperatures (SSTs) for the Auke Bay Laboratory from January 1959 through April 1963 were taken on the beach at a private residence adjacent to the laboratory. These temperatures were normally taken between 0700 and 0800 hours with a mercury-in-glass thermometer at the waters edge. From May 1963 through 1969, the temperatures were...
