Reviews

It is one of my personal favorite publications. Indeed, it actually performs, still an amazing and interesting literature. It has been printed in an exceptionally easy way which is merely soon after I finished reading this book where it really altered me, changed the way I believe.

Watson-Guptill Publications, United States, 2001. Paperback. Book Condition: New. 277 x 211 mm. Language: English . Brand New Book. A guide to drawing cars, trucks and jets. All the most spectacular models are included, from Lamborghini to Lotus to Porsche as well as the entire array of American muscle cars. Timeless classics are highlighted, such as the Jaguar XKE and the Gullwing Mercedes, as are racing cars, such as Formula One, stock cars and rally racers. There are lots of diagrams and blueprints, which demonstrate how a car is built and how an engine works. The cars are also depicted in scenes (not in static isolation), such as car races, race car crashes, and races around hairpin turns. In addition, each car features its own set of statistics: horse power, top speeds, and the price tag. The trucks are also depicted in action scenes, crushing rows of cars, just as they do in monster truck events. The fighter jets covered include the fighter jets of the US Air Force, such as the stealth fighters, radar jets, bombers, and Apache helicopters. Statistics are given on just how fast these machines fly - up to three times the speed of sound.
